Manufacturing Tolerances for Tx power

The D350 equipment is a PMR product having a conducted transmitter power of 1 or 5Watts into 50 ohms.

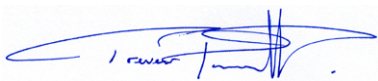

The transmitter is set up in manufacture to have the following power setting tolerances:

Power Output	Signal dBm	Tolerances
High	37dBm	+1.0dB – 0.5dB
Low	30dBm	+1.5dB -1.0dB

Table 1: Output power limits.

The equipment can be set for low or high power operation by the equipment user and operates within the limits above. The fundamental power levels cannot be altered by the user.

Yours faithfully
